

Dear Recipient,

Thank you for your interest in the Cancer Patient Navigation Toolkit. This *Toolkit* is designed to create dialogue in communities across the country about the importance of providing cancer patient navigation services to help assure timely access to the full continuum of cancer care services.

This *Toolkit* does not detail “how to” create a program. Rather, it is a marketing tool for promoting the concept and development of community based patient navigation programs. It is targeted to national and state stakeholder organizations and their respective members. Other toolkits address the details of creating a navigational program. This *Toolkit* includes a 28 minute promotional video, a 7 minute trigger video, and additional materials that demonstrate the importance of community based patient navigation programs.

Finally, while there is no cost for the *Toolkit*, we do ask that you complete the ‘Call-to-Action’ form which is located on the website. This form provides us with valuable feedback on how organizations are implementing or will implement the *Toolkit* in their communities.

Please feel free to contact me with any questions, comments and/or suggestions at ttbryant@c-changetogether.org or (202) 756-1431.

Sincerely,

Tasha Tilghman-Bryant
Project Associate
